

CASSIOPÉE DFR

DIGITAL FLIGHT REPORT

- Automatic flight reports generation
- Electronic signature & biometric authentication
- MIS compatibility

 CASSIOPÉE

CASSIOPÉE DFR

Digital Flight Report

Part of Cassiopée flight services suite, the Digital Flight Report (DFR) mobile application allows the pilot to automatically generate his flight reports thanks to the recorded avionics data. Combining simplicity, time savings and high reliability, the DFR guarantees a traceability and a secure transmission of the data, thanks to the pilot's biometric authentication.

HOW DOES IT WORK?

At the end of the flight, the recorded avionics data are instantaneously transferred via Bluetooth to the DFR application and the flight report is automatically pre-filled. The pilot checks the data, authenticates and signs the report with biometric solutions (fingerprints or facial recognition). The digital flight report is transmitted and stored in Safran Cloud through secured communication.

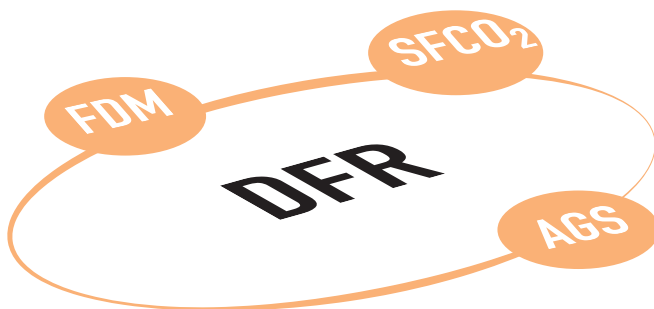

SIMPLICITY & RELIABILITY

The DFR application offers:

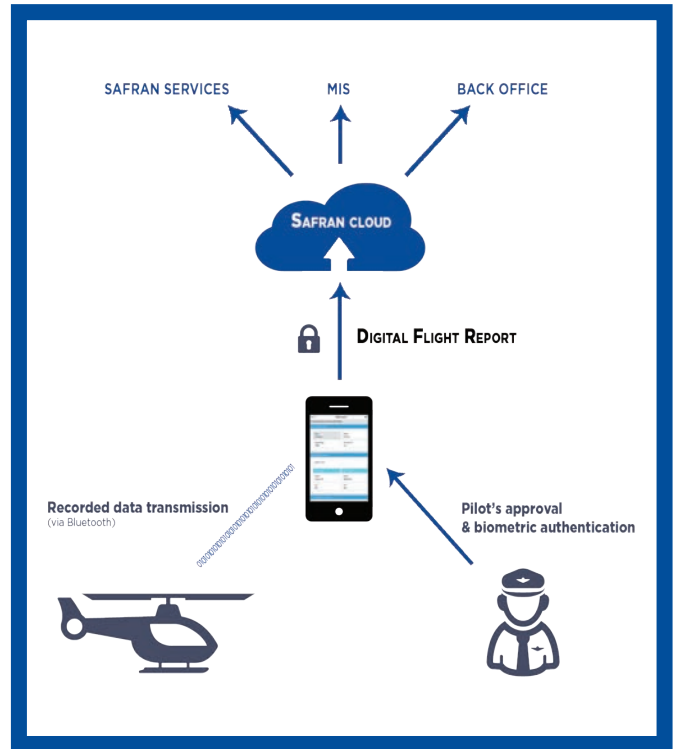

- Automated dematerialization of paper flows
- Avionics data authenticity
- Pilot's biometric authentication
- Data traceability & secured transmission
- Flight reports & avionics data matching

With Cassiopée suite, you can also track your helicopter's configuration & associated maintenance operations.

ASSOCIATED SERVICES

All Cassiopée services and the associated analyses can be seen on the secure portal www.cassiopée.aero

CASSIOPÉE: A COMPLETE SUITE OF FLIGHT SERVICES OFFERED BY SAFRAN

Based on flight data recorded during the different phases of the flight (taxi out/taxi in, takeoff, cruise, approach, landing), Cassiopée gives airlines, business jet and helicopter operators with innovative, modular services in five basic areas:

- ★ Safety management
- ★ Maintenance management
- ★ Regulatory management
- ★ Cost management
- ★ Flight ops efficiency
